

Permanent Water Quality Waiver

Project Name: _____

Project Location: _____

Primary Permittee: _____

SWPPP Preparer: _____

Select one of the following, and provide supporting documentation (as necessary), to justify a Waiver:

- Land disturbance for this project (or associated Larger Common Plan) will be less than 1 acre.
- Impervious area is the same or decreasing pre-to-post AND land use is not changing in a way that may increase potential for pollution migration off site. Need to provide specific land use pre- and post-development, and impervious area pre- and post-development.
- An alternative water quality plan is designed that provides a reasonable alternative to water quality storage and release time requirements and that still fulfills the intent of the regulations. Specific development sites may not have enough land area to incorporate traditional water quality structures that provide the required storage volume. Alternative technologies and development techniques may be acceptable provided that sufficient documentation exists as to the effectiveness and reliability of the proposed structures or techniques.
- Exceptional circumstances exist such that strict adherence to the regulations could result in unnecessary hardship and not fulfill the intent of the regulations.
